

PRODUCT DATA SHEET

Product ID RGL11

Description: Kernmantle Rope Lanyard & Shock Absorber

Accredited to: EN 354:2010
EN 355:2002

Material: 11mm Kernmantle rope

Fittings: RGK15 and RGK19

Max arrest force: < 6kN

Features: Fitted with shock absorber pack

Length: 1.7m

The RGL11 is fully approved and used extensively by major utility companies. It can be attached direct to a suitable anchorage point or can be choked around a pole or similar structure.

The triple action karabiner provides quick and extra safe connection to the harness D ring while the triple action karabiner on the outer end allows for quick connection to approved EN795 anchorage points. Nylon kernmantle static rope has high energy absorption and exceptional resistance to abrasion. It meets the requirements of EN1891.
