

PDU's with surge protection

Horizontal and Vertically (Zero U) mounted UK socket PDU's with options of 4 standard plug connections up to 16A.

Surge protection protects vital equipment from low-frequency, high-voltage spikes of electricity. By either blocking the spike, or shorting it to ground, the surge protector keeps any unwanted voltages above a safe threshold.

Product Description

H13A/4F	Horizontal 4-way UK PDU, covered switch, surge protection, 3-metre lead
H13A/5F	Horizontal 5-way UK PDU, covered switch, surge protection, 3-metre lead
H13A/6F	Horizontal 6-way UK PDU, covered switch, surge protection, 3-metre lead
V13A/8F	Vertical 8-way UK PDU, covered switch, surge protection, 3-metre lead
V13A/10F	Vertical 10-way UK PDU, covered switch, surge protection, 3-metre lead
V13A/12F	Vertical 12-way UK PDU, covered switch, surge protection, 3-metre lead

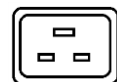

PDU options

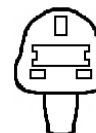

IEC C14 plug
IEC 60320 (320)

16A commando plug
IEC 60309 (309)

IEC C20 plug
IEC 60320 (320)

13A plug
BS1363

Surge protector technical data

Voltage	240 V
Current	16A
Protection	430 V @ 1mA
Response Time	< 25nS
Max Surge	6500A
Clamping Voltage	775V
