

PRODUCT DATA SHEET

Product ID RGL2

Description: Single Leg Rope Lanyard & Shock Absorber

Accredited to: EN 354:2010
EN 355:2002

Material: 11mm Kernmantle Rope

Fittings: RGK1 and any compatible EN362 connectors

Max arrest force: < 6 kN

Features: Fitted with shock absorber pack

Lengths: 1.3m and 1.8m

The RGL2 Lanyard is of traditional type, using 11mm Kernmantle rope which has machine stitched connection eyes at each end.

The lanyard is fitted with a standard shock absorber pack, even though the rope itself has some shock absorbing capacity. The rope used in the manufacture of this lanyard, shows some resistance to alkalis, oils and organic solvents.

This lanyard should be used when the operative is working from a static position, connected to a fixed anchor point. If movement between anchorages is required, a twin leg webbing lanyard should be used (RGL3) to provide constant protection.
